

About SMU

A premier university in Asia, the Singapore Management University (SMU) is internationally recognised for its world-class research and distinguished teaching. Established in 2000, SMU's mission is to generate leading-edge research with meaningful impact and produce broad-based, creative and entrepreneurial leaders who will thrive in the global economy.

LIB001 - Library Research Skills 2023-24 - LibraryRS 2023-24

What: LIB001 - Library Research Skills 2023-24 learning activities (LAs) and quizzes in eLearn by 31 August, 11:59pm.

Why: LIB001 is one of the highly recommended programmes in the SMU Holistic Student Development Framework. Upon completion, it will appear in your Co-Curricular Activities (CCA) transcript.

3 Complete the LAs and quizzes on the Content tab LA 1 Digital Literacy: What you need to know LA 2 Finding Your Course Reading Using the Library Search LA 3 Avoiding Plagiarism Through the APA Style LA 4 The Research Process

Quizzes are due on 31 August, 11:59pm.

By the Students, For the Students

Library Orientation & Tours

Come and get to know about the 4-level Li Ka Shing Library and 3-level Kwa Geok Choo Law Library. Our digital library also provides you with numerous resources that you will need for your studies in the next few years at SMU.

Learn more about the essential library services from the LPAs during the library orientation and tour, where they will share with you various library resources available to you and the best study spots in the Libraries. Get yourself equipped with these tips and tricks to lickstart your learning journey!

Watch this 'LPA Confessions' video in which the LPAs share stories and hacks about SMU Libraries.

Avoid Plagiarism! Cite It Well

The start of a new semester indicates the start of project work and writing papers and reportal Attend an APA Citation workship to gain awareness of plagiarism and learn skills to avoid it by using citation and reference techniques. During the season, our librarians and LPAs will guide you how to othe different types of resources through the APA referencing style. Also check out the LIB001 - Library Research Skills learning activity on Avoiding Plagiarism through the APA Style in eLearn and refer to the library research guide! How do Juse APA Citation Style.

Learning Tips & Tricks

Due to the pandemic, we have pivoted to hybrid learning where some classes are face-to-face and others online. In order to prepare our students for the "new normal" in the upcoming term, LPAs share their experiences and tips for successful learning to help students adapt and get the most out of hybrid classes and campus life.

Learning Is Different! Top 3 Hacks is a comprehensive library guide to learning tips & tricks oursted by our LPAs. Furthermore, the LPAs conducted Succeed in Learning Workshops to introduce online learning tools that professors use in a virtual classroom and help students orient themselves towards a positive learning mindset. Check out the workshop slides and recordings and get ready for the new term with advice from your peers!

GETTING READY FOR TERM ADVICE FROM YOUR PEER

Learning Is Different!

TOP 3 HACKS

Research Skills

Improve your research skills and reduce your academic anxieties! SMU Libraries subscribe to over 190 databases, all at your disposal! They may sound intimidating to you right now, but trust us, you will need them sooner than you think. These databases offer you a wide variety of credible resources you can't find on Google. The best thing? It's all in one place - the Library Search!

Don't know where to start? Attend a session of the Bite-Sized Library Workshops, Business Research - Wish I Had Known This (for UG by UG), and tackle business research for class assignments with our IEBs, who will below their incipitity and fine for harnessional library reportings for paradesing research

Find out more about the following research tool and database that LPAs recommend!

LibKey Noma

Engagement

SMU Libraries engages with its users to celebrate their scholarly and academic achievements and to bring awareness to relevant and timely events and resources.

Engagement activities, which are often organised by the Research Librarians, include:

- SMU Libraries Curate a collection display both in physical form and online, showcasing books, SMU publications and multimedia resources
- Organising book launches and book talks
- Conducting workshops and specialised seminars
- Collaborating with Faculty for student projects
- Support for student clubs and societies for competitions such as moots, business case competitions, and conferences.
- Curating events, seminars and exhibitions with local and international speakers and industry partners on current affairs topics and the annual "World Ahead" series by The Economist.
- Coordinate with the Research and Data Services to request for author-final versions of full-text papers,
 data for the Institutional Repository (InK) and Data Repository (RDR) for SMU research datasets

Diverse-City 2022: Lonely Planet books in SMU Libraries

SMU Libraries, together with the Student Success Centre, Office of Provost and other campus partners celebrate Diverse-City, an international experience of diversity. In the past two years, travel was limited and, in many cases, off-limits. With positive changes afoot, we all look forward to being fellow travellers again. We have curated a collection of fifteen Lonely Planet guidebooks for you. May these inspire your desire to travel again!

Physical resilience revolves around four aspects - sleep, nutrition, physical activity and creating a safe environment for oneself. Let's build up and strengthen our physical resilience by making small adjustments in our everyday life, which could make a big difference and have a significant impact on our mental well-being.

SMU Libraries, in support of SMU Mental Health Week, invite you to get active and learn self-care tips through this specially curated resource list.

Get Active and Feel Good by visiting our book display at Level 2, Li Ka Shing Library and pick up a read before 28 October 2022!

ENGAGING WITH THE COLLECTION

ENGAGEMENT WITH STUDENTS

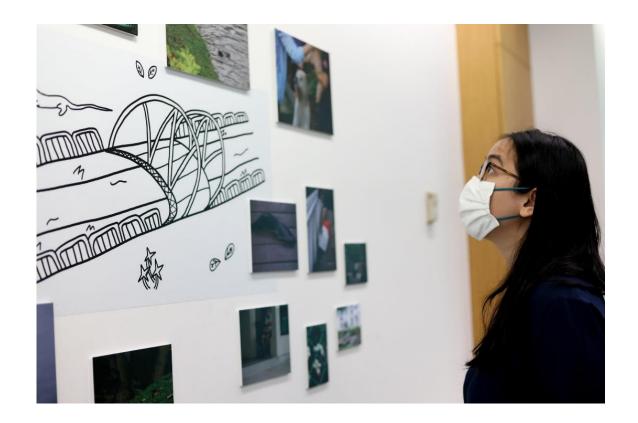

STUDENT PHOTOGRAPHY WORKSHOP & EXHIBITION

Cultivate connections, entrepreneurialism, and diverse learning experiences in sustainable spaces

The Libraries' spaces, physical and virtual, are active environments that inspire and educate through collaboration, curation, events, arts, and expertise.

COMMENTS FROM STUDENTS

"One of the major focusses for businesses in the digital age is to effectively communicate with their different stakeholders across various cultures with the ultimate objective to build the company's reputation. I always felt that photographs have the potential to be an effective communication tool that impacts people from multiple cultures, without the use of text in a specific language.

Photographs help people relive moments, broaden perspectives, sparks imagination and ignites dreams, but in the language, tone and pace the viewer is comfortable with. This workshop and exhibition helped me reinforce my beliefs as we developed visual literacy through discussions on how photography can be used as a communication tool."

- Shabbir Akhtar, a postgraduate at Lee Kong Chian School of Business

COMMENTS FROM STUDENTS

"This workshop and exhibition constantly ensured I was pushed outside of my comfort zone as a photographer. I experienced for the first time how intimate photography can be, having to snap the sights around me, as well as the necessity of intentional integrity in presenting on an issue that we sometimes overlook."

- Makarios Tang Way, undergraduate at School of Social Sciences

"This opportunity by SMU Libraries and Objectifs gave me a new lens on how to view photography as an art form. I got a better grasp of what professionals saw and it was often different from how I saw my own photographs. It was very useful to get critique on why certain pictures worked while others did not. While honing the eye takes practice and lots of trial and error, I found the sessions fruitful in giving me a further starting point. The concept I chose to explore was also a deep dive into how open and authentic I could be and I am proud of the process of learning more about how much of me goes into my art. I have always loved photography and this experience has given me the tools to approach photography in new ways."

- Tan Huei Suen, undergraduate at School of Information Systems

Literature & Systematic Review Support Service (Pilot)

- Support literature surveys and review articles
- Support systematic reviews and meta-analyses, scoping reviews, systematic mapping reviews, rapid reviews and other systematic or structured approach to literature reviews
- Support of powerful tools (with AI) both free (Citation Chaser, VOSviewer, Biblioshiny) and paid (Scite.ai assistant, ATLAS.ti)
- https://library.smu.edu.sg/services/literature-andsystematic-review-support-service

Scite.ai assistant - autogenerates direct answers with citations

How can Librarians help?

Librarians are trained in supporting the process of reviews, systematic reviews and other evidence synthesis methods custom-made for specific or multidisciplinary disciplines. They can:

- Provide guidance on the use of specific methodologies and conducting standards (e.g. Cochrane Collaboration, Campbell Collaboration, Collaboration for Environmental Evidence etc)
- Recommend databases and other sources for specific disciplines*
- Design and implement comprehensive and reproducible search strategies (including specific filters by journal titles) for multiple databases*
- Provide guidance on efficient bulk extraction and deduplication of search records found
- Recommend and assist in the use of other software to aid with the literature review process including:
 - Covidence (Whole systematic review process)
 - ASreview (Semi-automated screening)
 - Zotero (Deduplication)
 - Various tools for citation chasing and other supplementary search methods
- Assist with best practices for reporting and documentation (e.g., PRISMA 2020 reporting standards)

 Presentations created by University of Colorado Libraries and archived in OSF
- Writing your Journal Article in 12 weeks: A Guide to Academic Publishing Success by Wendy Laura Belcher.

Helps academic authors to produce the publications for their fields. A guide that focuses specifically on publishing humanities and social science journal articles.

Journal Tools

Check these tools to get suggestions on journals to submit your article:

- JANE: Journal/Author Name Estimator
- · Journal Guide by Research Square
- · EndNote Web Manuscript Matcher
- · Springer Find the Right Journal
- Elsevier Journal Finder

What are the journals in a subject area?

Check these tools for journals in a particular subject area or category:

Journal Citation Reports ☑

Use this tool to evaluate the impact and influence of journals indexed by Web of Science. In Journal Citation Reports, you can browse by subject category and view journal impact factors of journals indexed in SCIE, SSCI and AHCI & ESCI (from JCR 2023 onwards).

SCImago Journal & Country Rank

 The open access SCImago Journal & Country Rank (SJR) is a portal for journals and country scientific indicators developed from the information contained in the Scopus database. It covers over 20,000 journals and over 230 countries.

Open Access Publishing

Open Access is a term used to describe electronic content that a reader can access free of charge.

Open Access publications available online would include articles, preprints, conference papers, working papers, theses, books and book chapters. There are different types of Open Access:

Search this Guide

Search

- Green the author can self-archive at the time of submission of the publication in an
 institutional repository or post it on a website. The publication can be a peer-reviewed journal
 publication, a peer-reviewed conference proceedings paper, grey literature (usually internal
 non-peer reviewed), or a monograph. The version of the publication can be the published
 version, author final version or pre-print (before peer review).
- Gold the author or the author's institution can pay an article processing charge (APC) to the
 journal publisher to provide free, immediate access to the article via the publisher websites
- . For more details, see: Did you know that open access comes in different flavours?

Benefits of Open Access Publishing

The benefits of Open Access (OA) include:

- Increased visibility, usage and impact. If there is no open access, the only way to see academic
 work is to pay for subscriptions to journals or to pay for an individual article at a publisher's
 website. This effectively restricts access to the minority who can afford to pay for access in
 these ways. Thus researchers gain from the increased usage and impact of their works. The
 institutions of the authors also benefit from the aggregated usage and impact of their
 researchers and the increased presence brought by Open Access. Society also benefits from
 better technology transfer, better diffusion of know-how and a better-informed public.
- Links: It is possible to crosslink the publication to any research datasets and software used in
 producing the paper. This improves the research process by allowing other researchers to
 examine in depth the published work and validate or contradict the conclusions.
- Access and discoverability: Anyone is able to access and read the papers that are open access. The papers are usually indexed by various search engines and discoverable to a wider audience.
